Five Prestigious Universities

The American Association for Physician Leadership® partnered with five top universities that recognize association courses as prerequisites and extend tuition savings to our students.

The American Association for Physician Leadership® created Master’s degree prerequisite courses—and built partnerships with five prestigious universities across the United States—so you can earn a graduate degree with minimal disruption to your professional life.

Degree choices include: Master of Medical Management (MMM); Master in Business Administration (MBA); Master in Healthcare Quality and Safety Management (MS-HQSM) and Master of Science in the Science of Healthcare Delivery—all with a medical management focus.

The programs offer you the ultimate in flexibility. For instance, depending upon which degree you pursue, you can take classes live or online. Sign up for courses when you want to—there are no registration deadlines.

Pay as you go—enjoy up to a 10 percent savings on university tuition.

Start with Prerequisites

All five universities accept 125 CME hours of prerequisite courses from the association as part of their degree curriculum. These courses cover the most important competencies in medical management and leadership—taught by nationally recognized faculty. Core courses include:

- **Physician in Management Seminar** (Most people begin with this foundational course covering 6 critical competencies of leadership—providing both core and elective credits)
- **Managing Physician Performance**
- **Techniques of Financial Decision Making**
- **Three Faces of Quality**
- **Essentials of Health Law**
- **Foundations of Financial Accounting** (Core effective January 2017)

**FAST FACTS**

- Prerequisite courses are designed exclusively for physicians.
- No application or commitment is required to begin our prerequisites and no GMAT is required when applying for a degree—MMM and MS-HQSM degrees require MDs and DOs.
- Start any time. Association prerequisites are offered throughout the year and courses can be completed entirely online or combined with live classes.
- Earn CME while completing the degree prerequisites.
- Prerequisites can be completed in as few as 6 months or spread out over 5 years.
- Pay as you go. Prerequisite tuition starts at $6,800 (including member discounts).
- Save up to 10% on university tuition.
- Take an online test after each course to qualify your credits and complete your association transcript.
